Profile

Rich Hoffman is the Assistant Vice President of Forensics and the lead examiner for UnitedLex. Rich regularly serves as an expert witness in both state and federal courts and is recognized as a forensic expert in the International Court of Justice which is commonly referred to as the World Court. As leader of the UnitedLex forensic training program, Rich trains law enforcement personnel, internal corporate investigators and law students on computer forensic analysis and has performed thousands of data collections throughout the United States, Canada, the United Kingdom, Japan, Denmark, France, Norway, the Republic of Korea, Russia, India and Taiwan.

Rich created and maintains the UnitedLex policies and standard operating procedures for seizing, imaging, archiving, verifying, and storing digital evidence. In recognition of his unique ability to simplify the complex workings of computers and networks, Rich is frequently invited to speak and present at conferences and seminars on the topic of computer forensic analysis and best practices.

Rich also has significant experience assisting clients in responding to information security incidents and data breach events. As a senior member of the UnitedLex Cyber Risk Solutions group, Rich provides rapid on-site response and on-call advisory services to a wide range of clients that have suffered a network attack or other compromise of their IT infrastructure.
